STARTER, STEP 2

Give Claude its own desk.

Projects: the same question, outside and inside.

One job, its own instructions, its own files.

WHERE

Sidebar, Projects, New project.

1. Name it, for example "Renewals"

2. + next to Instructions: the rules for this job

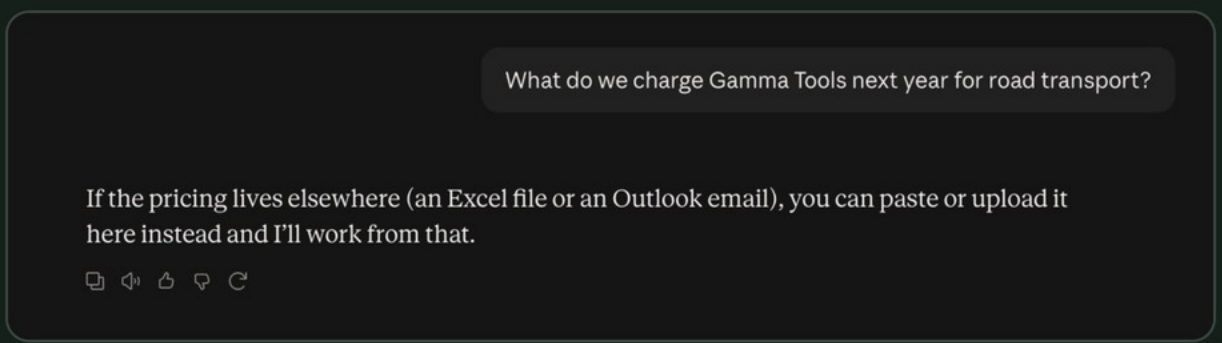

3. + next to Context: upload the file, like a price list

4. Ask from the project page

Free plans can have up to 5 projects.

BEFORE

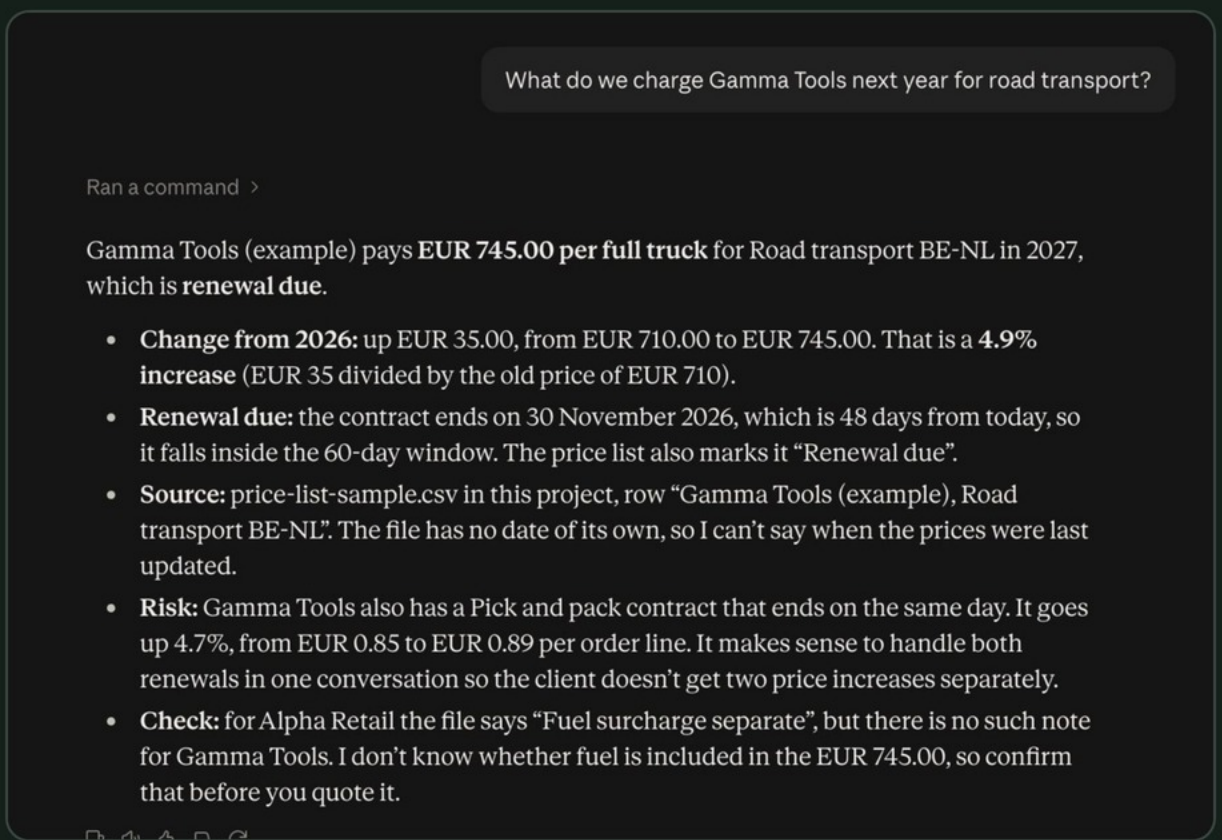

"What do we charge Gamma Tools next year for road transport?"

A plain chat outside the project. No price list, so Claude cannot know.

AFTER

Same question, inside the project.

EUR 745 per full truck, the source row named, and two things we did not ask about flagged.

LOOKS THE SAME?

Ask where the number comes from.

Before gives a price anyway? If it is not in a file, it was a guess.

After misses the file? Check it shows under Context, and ask from the project page.

A project chat shows the project name above it.

THE RULE

One job, one project.

Our estimate: 5 minutes a day of pasting saved.

The project instructions and the sample price list are free:

github.com/jwconsultancyteam/ai-starter-kit

Next: which Claude for which job.
