STARTER, STEP 3

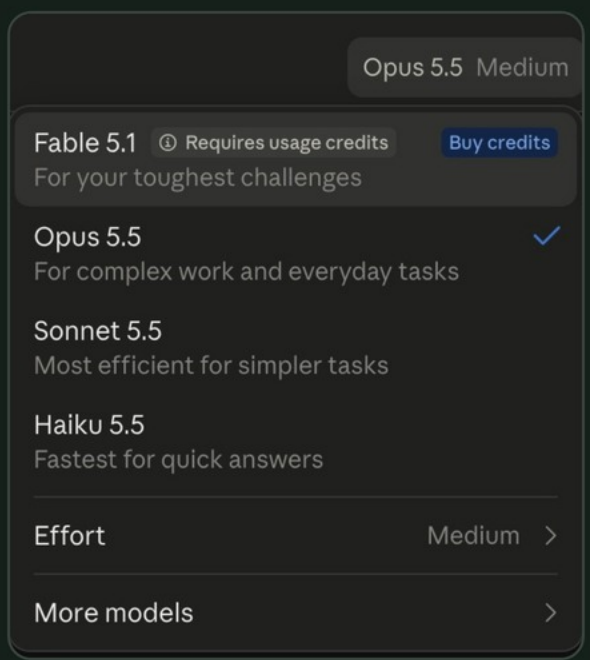

Which Claude for which job.

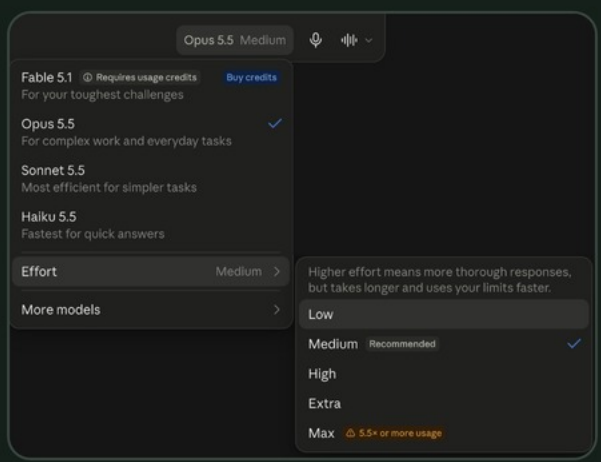

One question, three models.

And the effort: how hard it thinks first.

WHERE

Click the model name in the chat box.

Start on effort Medium, the level the menu recommends. Higher is slower and uses your limits faster.

HAIKU 5.5

"Gamma Tools asks for 6% off. Three options and my reply."

1. **Full 6% now:** €700.30 per truck (−€44.70 vs the 2027 list). This is also €9.70 below their 2026 price of €710.00, so it is a real cut year on year.
2. **Split the difference at 3%:** €722.65 per truck (−€22.35 vs list, +€12.65 or +1.8% vs 2026). This keeps a visible increase while giving them something.
3. **6% conditional on a longer term:** €700.30 per truck only if Gamma signs a two-year term, with the 2028 price reviewed at that point. This trades the discount for commitment. I don't have their volume data, so check whether the term is worth it to you.

Draft reply to Gamma Tools

Subject: Road transport renewal, BE-NL

Hi [Name],

Thank you for your request on our BE-NL road transport rate. We value the work we do together, and we have looked at the renewal with that in mind.

[Option 1: We can offer 6% off the 2027 rate, bringing it to €700.30 per full truck.]
[Option 2: We can offer 3% off the 2027 rate, bringing it to €722.65 per full truck.]
[Option 3: We can offer 6% off, bringing the rate to €700.30 per full truck, on a two-year term with the rate reviewed for 2028.]

The pick and pack rate and other terms would stay as currently drafted. Could we take 20 minutes next week to agree on the final terms before your contract ends on 30 November?

Best regards,
[Your name]

About 15 seconds. The right numbers, but every client in the table, and one draft with the options in brackets.

SONNET 5.5

One complete email. One wrong note.

Read the project price list ›

Gamma Tools, Road transport BE-NL, per full truck: 2027 price is EUR 745.00 (2026: 710.00, +35.00 EUR, +4.93%), and the contract ends 2026-11-30, 47 days from today, so it is **renewal due**.

6% off 745.00 is 700.30, which is below their current 2026 price. Fuel surcharge stays separate, per the price list notes.

Option	2027 price per full truck	Change vs 2026 (710.00)	Discount vs 745.00
1. Hold the list price	745.00	+35.00 EUR / +4.93%	0%
2. Freeze at the 2026 price	710.00	0.00 EUR / 0.00%	-35.00 EUR / -4.70%
3. Grant the 6%	700.30	-9.70 EUR / -1.37%	-44.70 EUR / -6.00%

- **Option 1** keeps your margin and is the best position if you expect them to renew anyway.
- **Option 2** gives them a clear win, since there is no increase, and costs you less than the full 6%.
- **Option 3** only makes sense in exchange for something, such as a longer contract term or a committed truck volume. I have no volume figures for them in the price list, so I left those out.

Draft reply (Option 2, with Option 3 as a fallback):

Subject: Gamma Tools – 2027 road transport pricing

Dear [Name],

Thank you for your request regarding the 2027 price for Road transport BE-NL. Our 2027 price is EUR 745.00 per full truck, an increase of EUR 35.00 (4.93%) on the current EUR 710.00.

We value our partnership and want to help. We can offer to keep your price at the 2026 level of EUR 710.00 per full truck for 2027, which is a reduction of 4.70% on our 2027 price. The fuel surcharge remains separate, as today.

If you would like to go further, we are open to discussing a lower rate in exchange for a longer contract term or a committed volume.

Your current contract runs until 30 November 2026, so I suggest we agree on this in the coming weeks. Could we schedule a call this week?

Kind regards,
[Your name]
Example Logistics

About 17 seconds. The fuel surcharge note came from another client's row.

OPUS 5.5

A full email for each option.

Gamma Tools asks for 6% off their 2027 road transport price. Give me three options and draft my reply.

Ran a command ›

A Hold the price | B Meet halfway | C 6% for commitment

Subject: Your 2027 rate for road transport BE-NL

Dear [Name],

Thank you for your message and for the good cooperation this year.

We have looked carefully at your request for a 6% reduction on road transport BE-NL. Our 2027 rate of €745.00 per full truck reflects the higher costs we are facing for drivers, equipment and tolls, and we are not able to lower it.

Your current contract ends on 30 November 2026. I would be glad to set up a call before then to confirm the renewal and go over anything else you need for 2027.

Kind regards,
[Your name]
Example Logistics

Copy

There is one email draft for each option. Before you send one, fill in the name, plus the commitment terms if you go with option C. The cost reasons in the "Hold the price" draft are general wording, not taken from your file, so change them to your actual reasons.

About 25 seconds. It said which sentences were general wording, not from the file.

RULE OF THUMB

Pick by what happens next.

A quick check or a short answer	Haiku
A draft you will read and check yourself	Sonnet
Something you will send, sign or decide on	Opus
Not sure (Anthropic's advice)	Opus

All three got the maths right in our test. Answers differ a little every time.

THE RULE

Depth only where you need it.

The model is set per chat: check the name before you send.

The test and the price list are free:
