STARTER, STEP 4

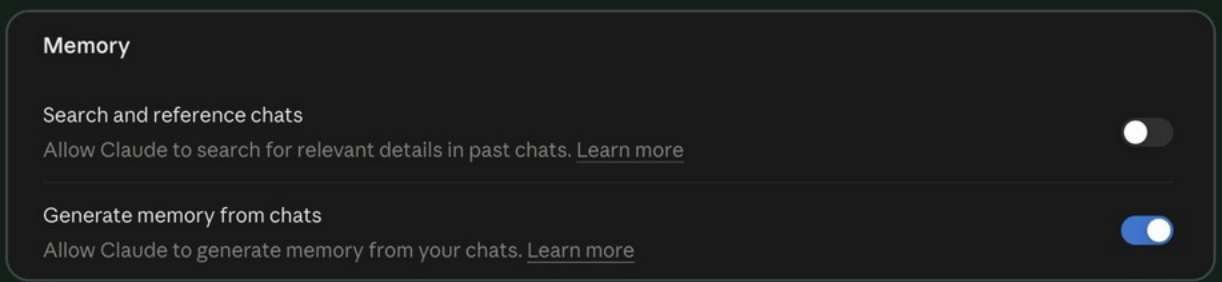

What does Claude remember about you?

Memory: the same question, three times.

Here, Claude takes the notes. You decide what stays.

WHERE

Settings, Memory. Two switches.

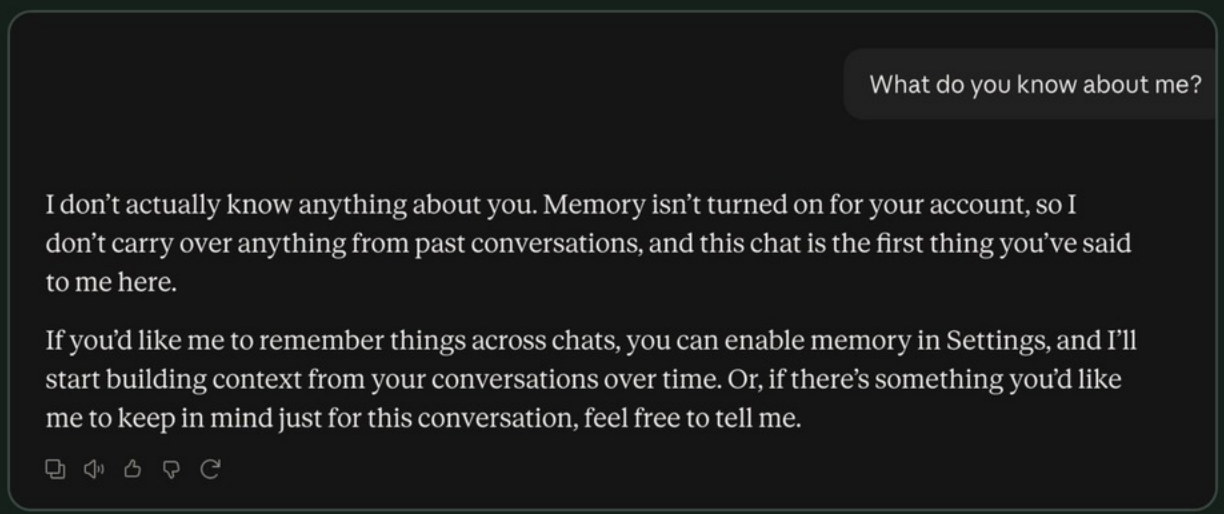

Search and reference chats: paid plans. **Generate memory from chats**: entries you can read.

Free, Pro, Max: on by default. Team, Enterprise: each member starts with it off.

1. MEMORY OFF

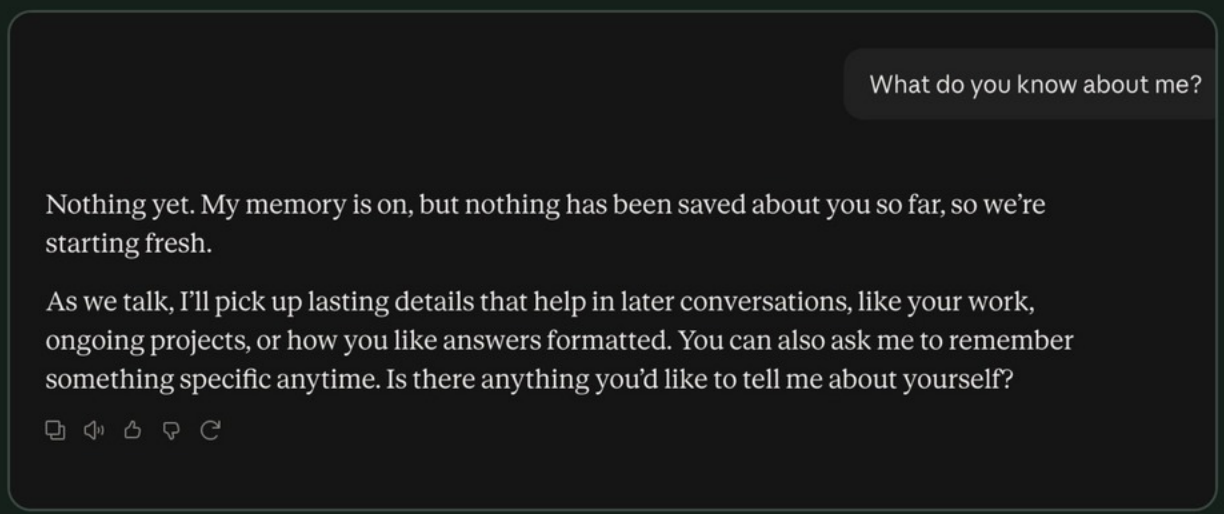

"What do you know about me?"

Nothing, and it says memory is not turned on.

2. AFTER ONE NORMAL CHAT

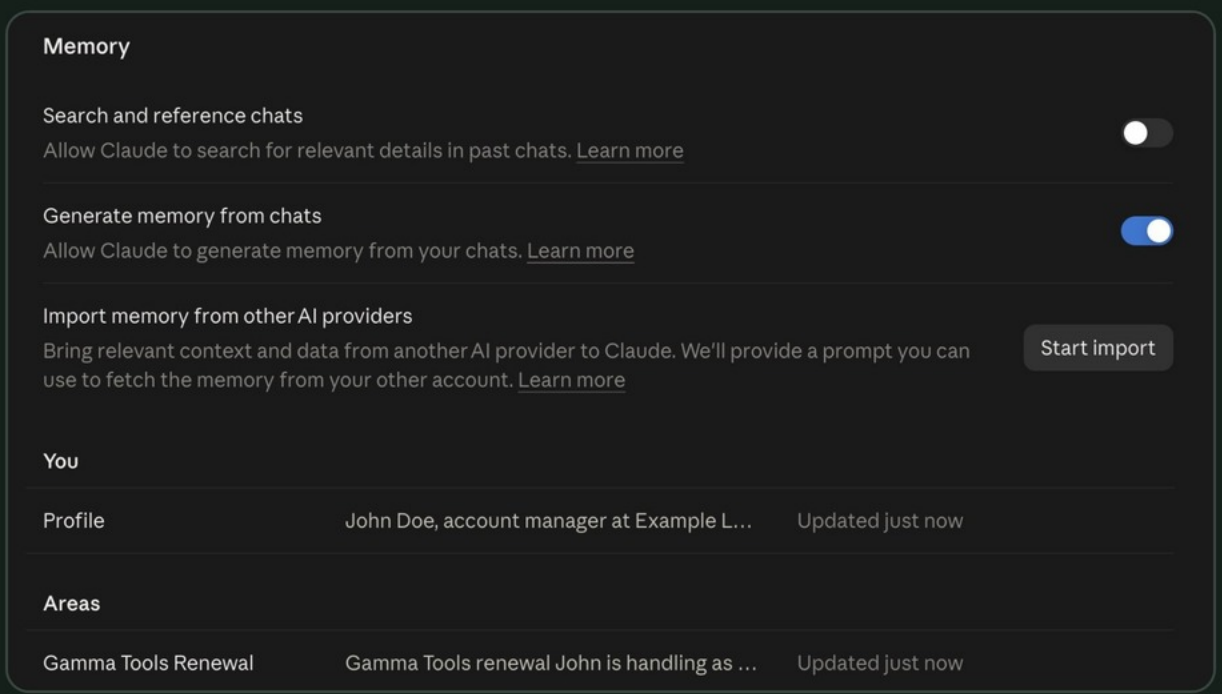

Still nothing.

Memory does not keep everything, and not right away.

3. "REMEMBER THIS: ..."

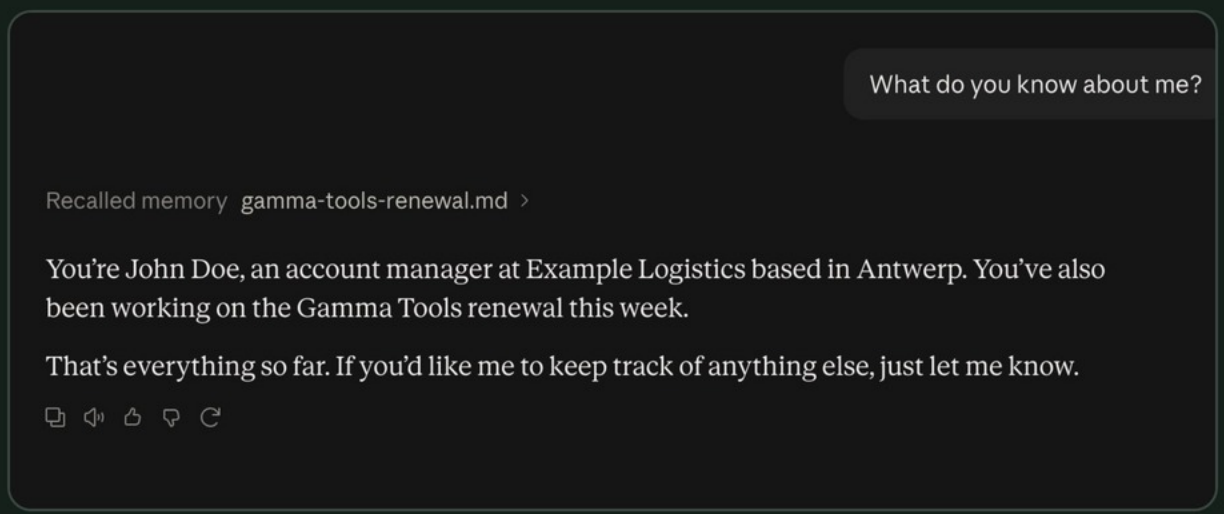

Two entries, both "Updated just now".

A profile under You, and "Gamma Tools Renewal" under Areas.

SAME QUESTION AGAIN

Now it knows.

Read, edit or delete every entry in Settings, Memory. Reset deletes everything and cannot be undone.

THE RULE

You decide what it keeps, and you can see it.

Want a chat it won't remember? The ghost icon: incognito.

Every step of the kit is free:
github.com/jwconsultancyteam/ai-starter-kit

Next: Chat, Cowork or Code.
