BUILDER, STEP 13

Claude Code on your own laptop.

One line. On our Mac: 10 seconds.

Install it, check it, and ask three questions that change nothing.

WHY ONE LINE

I build Limitguard in a couple of hours a day, after my project at Johnson & Johnson.

In those hours I have no time for a setup afternoon.

Step 11 ran Claude Code in a sandbox on the web.
Today it runs on my own computer, in my own folders.

THE ONE LINE

Open a terminal. Paste one line.

```
# Mac, Linux or WSL
curl -fsSL https://claude.ai/install.sh | bash

# Windows PowerShell
irm https://claude.ai/install.ps1 | iex

# Windows CMD
curl -fsSL https://claude.ai/install.cmd -o
install.cmd && install.cmd && del install.cmd
```

Anthropic, code.claude.com/docs/en/setup

We tested the Mac line. The Windows lines are from Anthropic's docs.

WHAT OUR MAC SHOWED

Installed. Then one check.

```
✔ Claude Code successfully installed!

  Version: 2.1.310

  Location: ~/.local/bin/claude
```

Open a new terminal window, then:

```
$ claude --version
2.1.310 (Claude Code)
```

A version number means it works. "command not found"? Open a new window first.

THE FIRST START

It asks how you sign in, and if you trust the folder.

```
 Select login method:

 ❯ 1. Claude account with subscription · Pro, Max,
Team, or Enterprise
   2. Anthropic Console account · API usage billing
   3. 3rd-party platform · Amazon Bedrock,
Microsoft Foundry, Google Vertex AI
```

```
 Claude Code'll be able to read, edit, and execute
files here.

 ❯ No, exit
   Yes, I trust this folder
```

Not on Free. Trust only a folder you made yourself.

BEFORE YOU ASK

Switch to Plan mode first.

Your Claude Code may start in another mode. Press **Shift + Tab** until the bottom line says:

```
⏸ plan mode on (shift+tab to cycle)
```

→ **Plan mode:** it reads and answers, it does not change files

→ **The folder:** only the made-up export from step 11

Then three questions. Next slide.

THREE QUESTIONS

A quick question gets a quick look.

QUESTION	ANSWER
What is in this folder?	Partly wrong. It missed NL-BE, the route with the most rows. It had read only the first 5 lines
What does the file contain?	Right: 198 rows, 7 columns, 8 weeks
Which three routes changed most?	Right: BE-BE +35, NL-BE +24, BE-FR -23. It read the whole file

We checked every answer with a separate count. When the answer matters, ask which lines it read.

FREE FILES

Your turn: one line, three questions.

- → The install steps per computer, with what our screen showed
- → The three questions, with the right answers to check
- → The made-up sample export
- → In your editor: VS Code, Cursor, JetBrains, or type claude in any editor's terminal
- → No terminal? The Claude desktop app has a Code tab

On my profile under Featured: AI Starter Kit, step 13.

Tomorrow: house rules for one folder. That is CLAUDE.md.
