STARTER, STEP 9

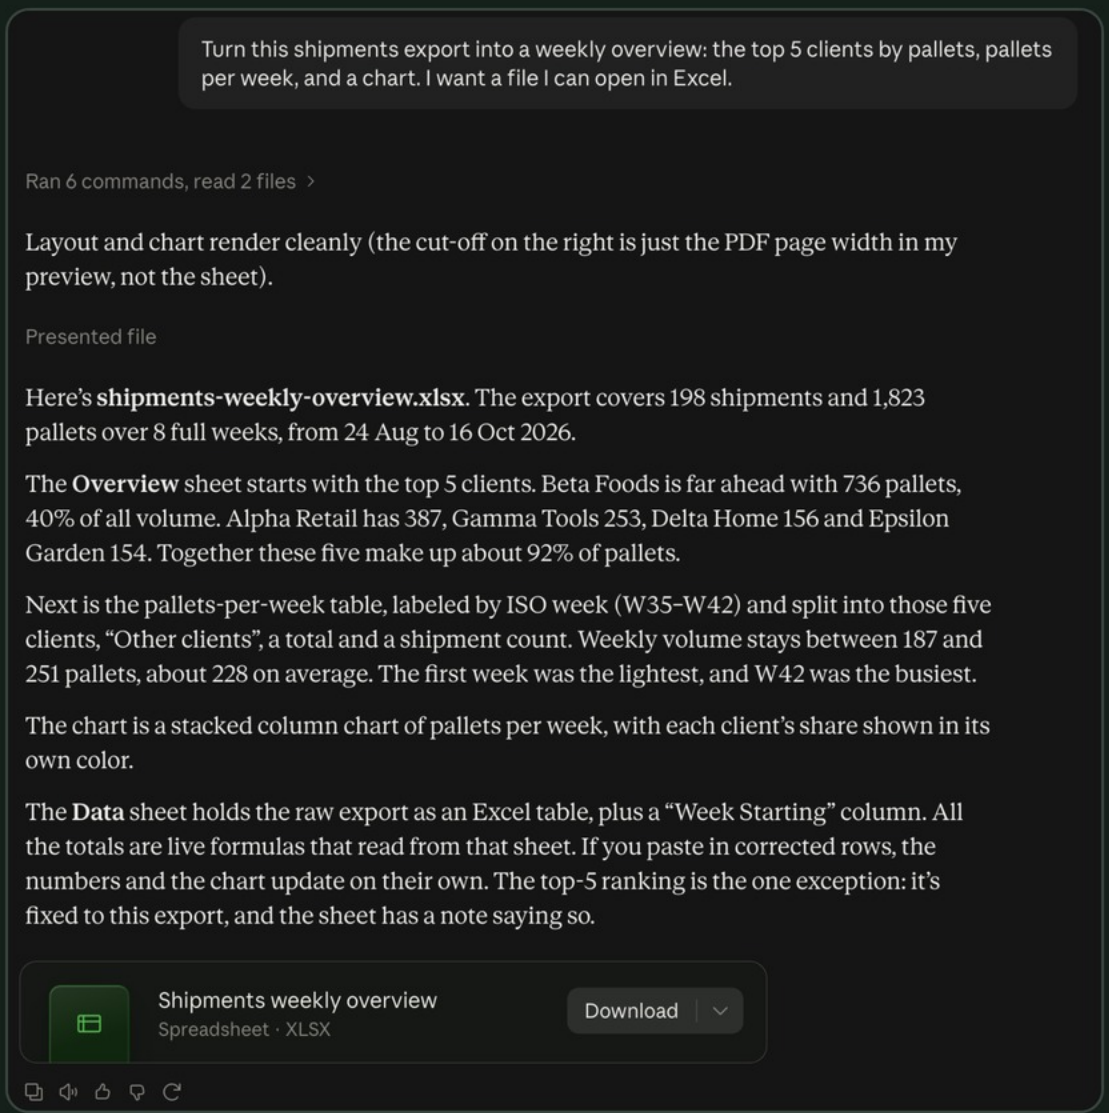

# Hand Claude the whole job.

Cowork: one task, three files.

We checked every number against the export.

FIRST, IN CHAT

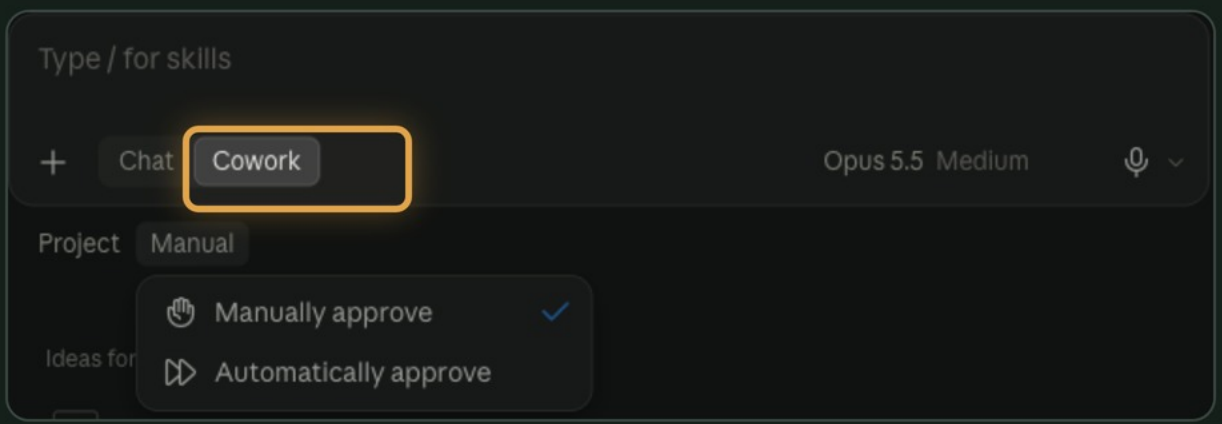

# Chat already makes the Excel file.

The right numbers for all 198 shipments. For one file, Chat is enough.

WHERE

# Under the message box: Cowork.

**Manually approve**: Claude asks before it runs a step.
**Automatically approve**: it doesn't ask.

Paid plans. Cowork on claude.ai is marked Beta.

THE TASK

# "Every Monday I report on last week's shipments."

**1.** The weekly overview in Excel, with a chart

**2.** A one-page PDF: the three biggest changes since the week before

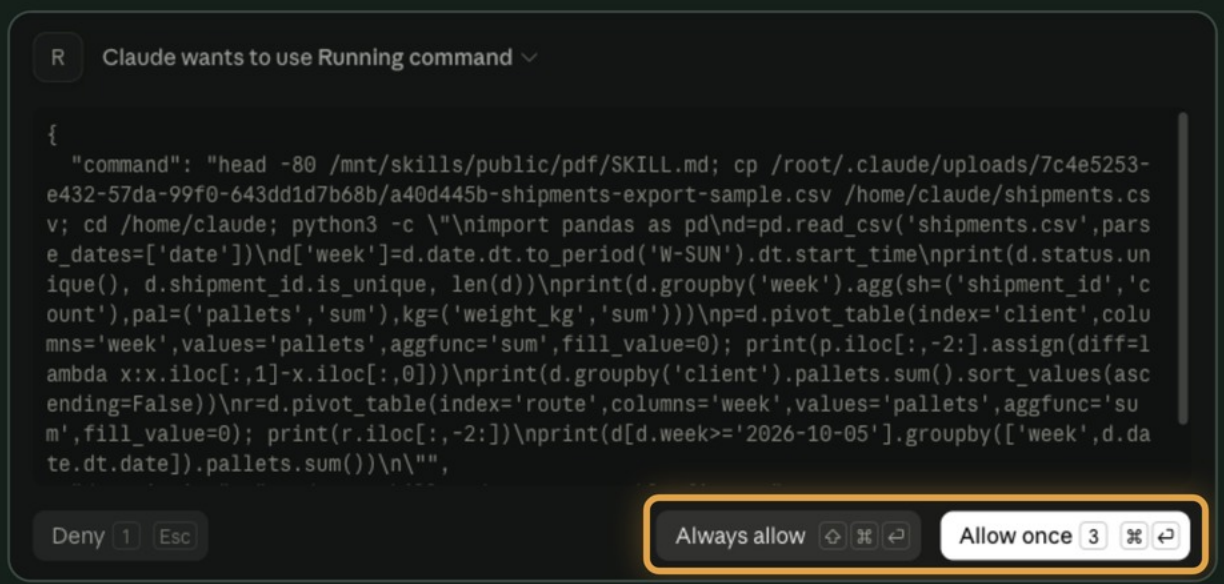

**3.** A short email to the team

**"Check your numbers against the export before you finish."**

Same export. Made-up clients.

IT ASKS FIRST

# Claude wants to run a step. You decide.

Deny, Always allow, or Allow once. We picked Allow once.

THE RESULT

# Excel, a one-page PDF and the email.

I've made the Excel overview, the one-page PDF and the email draft for week 42 (12–16 Oct), compared with week 41. I checked every number against the export and they all match: 198 shipments and 1,823 pallets in total.

**Last week in brief:** 251 pallets in 26 shipments, up 31 pallets (+14%) on the week before. That's the most of the 8 weeks in the export; the previous high was 247.

**The three biggest changes** (these are on the PDF):

1. **Beta Foods: +22 pallets** (76 → 98). They're now 39% of the week's volume and account for most of the increase.
2. **Delta Home: −19 pallets** (28 → 9), the largest drop of any client. They fell out of the top 5.
3. **Route mix:** domestic BE-BE more than doubled (25 → 60 pallets), while BE-FR fell from 71 to 48.

**Top 5 clients last week:** Beta Foods 98, Alpha Retail 63, Gamma Tools 39, Epsilon Garden 20, Zeta Sports 17.

Every number matched our own count. It also flagged a mistake in its own first email draft.

THE RULE

# One answer or one file: Chat. A job with steps: Cowork.

Check every number before you send it.

The sample export and the task are free:
github.com/jwconsultancyteam/ai-starter-kit

Tomorrow: the same task, every Monday at 07:00.
